

# GDP

Implementation and compliance  
*in air logistics*

**FROM JUNE 11<sup>TH</sup>  
TO JUNE 12<sup>TH</sup> 2024**

## **TRAINING ON GOOD DISTRIBUTION PRACTICES IN THE AIR LOGISTICS:**

### **Keys to implementation and compliance**

This course will enable you to:  
Understand the logistics needs of the pharmaceutical industry  
and ensure compliance;

Implement a quality management system in your operations to  
ensure compliance with GDP standards;

Identify and mitigate the risks associated with the temporary  
storage and transportation of pharmaceutical products;

Implement a system for quality management, auditing, risk and  
change management, and subcontracting management;

Identify key GDP people and the training needs of your teams;

Ensure continuous improvement of the system through  
performance indicators, self-inspection and root cause analysis;

Prepare you for external audits (certification audits, customer  
audits).
